-din SQL Developer:

The screenshot shows the SQL Developer interface with a query window containing the SQL statement: `SELECT * FROM DIM_PRODUS;`. Below the query window, the 'Script Output' pane displays the execution results. The results are presented in a table with 7 columns: ID_PRODUS, NUME_PRODUS, TIP_PRODUS, TIP_PRODUS_PARINTE, PRET_COST, PRET_LISTA, and ULTIMA_AC. There are 11 rows of data. At the bottom left, it states '11 rows selected.'
